Notes**1. Current Position**

- In July 2023, I switched from a visiting fellowship in Paris to a Leverhulme international fellowship at Stirling.
- I am Emeritus Professor of Philosophy and Cognitive Science at Macquarie University in Sydney, Australia.
- In April 2021 I took 'voluntary redundancy', as part of 'workplace change' processes.
- See p.2 below for my full career record.

2. Career Interruptions 2014 onwards

- In October 2014, my partner and collaborator Doris McIlwain (Associate Professor of Psychology at Macquarie University) was diagnosed with cancer. She died in April 2015.

- In December 2018, I was diagnosed with cancer. I had surgery in January 2019, and intensive radiation therapy from February to April 2019. Four and a half years out of treatment, I am fortunately cancer-free and in good health.

3. Updating

Main research fields

Philosophy of mind, philosophy of psychology, philosophy of cognitive science, philosophy of action, cognitive psychology, history of philosophy, history and philosophy of science, interdisciplinary cognitive humanities.

Main research topics

- Memory: autobiographical memory, collaborative recall, social remembering, embodied memory
- Skill: embodied cognition, expertise, cognitive control in skilled action, music, sport, joint action
- Distributed cognition: extended mind, socially distributed cognition, cognitive ethnography
- Mind and cognition: perspective in imagery and memory, dreaming, time, emotion, Wittgenstein
- History/ cognitive humanities: early modern philosophy, Descartes, history and philosophy of science, science studies, cognitive history, literature & cognition, film cognition, cognitive archaeology

Research contributions: overview

Philosophy of Mind and Cognition. My work is animated by the ‘distributed cognition’ framework of Hutchins and Clark. I’m leading advocate of a ‘2nd-wave’ approach to this idea that cognitive processes can spread across brain, body, and social and material world. I am one of few to apply rather abstract frameworks of ‘embodied cognition’ to memory. My work on skill and expertise has been influential in reviving naturalistic work on this topic, integrating philosophy of mind with sport science and music cognition, and expanding into recent ethnographic work on performance, dance and film. My new projects from 2022 focus on memory and place, integrating neuroscience, philosophy, and social sciences.

Cognitive Science. Unusually for a philosopher, I have gained skills in experimental cognitive science and psychology. With Barnier & Harris, I have expanded study of collaborative recall to autobiographical and emotionally significant memories. We examine the functions of shared memories in small groups, especially couples and expert teams, identifying interactive micro-processes that support emergent outcomes of remembering together. This experimental work on socially distributed remembering grounds new taxonomies of the dimensions of distributed cognition, and has driven a transformation in cognitive psychology: social influences on memory are no longer seen primarily as sources of confusion and distortion of individual memory, but as essential ongoing scaffolding.

Cognitive Humanities. I work in history of philosophy and science, and (more recently) cognitive literary/ cultural history. Early work reinterpreted Descartes on passions and brain/ body/ world relations; C17 & C18 theories of memory and self; and sciences of neural transmission. This work helped historians to see cognitive scientists as potential allies. In social science, I’ve contributed on memory in linguistics, cognitive archaeology, and media theory. My work on ‘exograms’ and ‘the cognitive life of things’ integrates ideas about cognitive artefacts with historical studies of material culture. With Tribble, I develop an interdisciplinary framework for cognitive cultural history, focussing on cognitive ecologies of skill in early modern England, and respond to scepticism on cognitive science in literary theory.

Select current collaborations

- Evelyn Tribble (English, U Connecticut, USA): cognitive history and cognitive humanities
- Daniel Schacter and Johannes Mahr (Psychology, Harvard), Cecilia Heyes (Psychology, Oxford), and Penny van Bergen (Education, Macquarie): memory as a culturally-evolved ‘cognitive gadget’
- Charles Fernyhough (Psychology, Durham), Marco Bernini (Cognitive Literary Studies, Durham) and team: Centre for Inner Experience, integrating neural processes with subjective experience
- Sen Cheng and DRG-funded team (Bochum, Germany): episodic memory and scenario construction
- Alex Easton (Psychology, Durham), Jamie Ainge (Psychology, St Andrews), Aidan Horner (Psychology, York), Jeremy Kendal (Anthropology, Durham): episodic memory and cognitive maps
- Agustin Fuentes (Anthropology, Princeton), Greg Downey (Anthropology, Macquarie), Alex Gillett (Philosophy, Macquarie) and Templeton-funded team: concepts as dynamic assemblages in human cultural evolution
- Giovanna Colombetti (Exeter), David Spurrett (U Kwazulu Natal): bad scaffolding and political cognition
- Karen Pearlman (Film, Macquarie) & Daniela Simone (Law, Macquarie): distributed creativity and copyright in film
- Ema Sullivan-Bissett (Philosophy, Birmingham) and AHRC-funded team: delusions and experience
- Christopher Williams (Music, Graz) and Austrian Science Fund team: musical improvisation and ethics
- Sune Steffensen (Centre for Interactivity, U of Southern Denmark, Odense): cognitive ecologies of language
- Charles Wolfe, Barnaby Hutchins, Cat Moir, Sarah Daynes (translators) and Jeff Olick (editor): I am editing the first full English translation of Maurice Halbwachs, *The Social Frameworks of Memory*, for Oxford University Press.
- Rob Wilson (U Western Australia) & David Ludwig (Wageningen): keeping kinship in mind.
- Celia Harris (Western Sydney), Wayne Christensen (Barcelona) Chris McCarroll (Taiwan), Mike Wheeler (Stirling), Kirk Michaelian (Grenoble), Kath Bicknell (SBS Broadcasting); Sarah Gensburger (CNRS/ Sciences Po).

Research grants

My total research grant income is over AUD \$12,510,000 across 47 funded projects (10 solo): 10 external Australian grants (including 8 Australian Research Council [ARC] grants), 12 international grants, and 25 Macquarie University or other internal/ partnership grants.

Graduate and Undergraduate Teaching: summary

This page offers a summary – further details are on the subsequent pages (pp.31-36 below).

Graduate Teaching

Since 2008, I have taught seven semester-long graduate seminars, for new PhD students and/or Masters research students. These seminars provided a shared basis for interdisciplinary research with methods from psychology, philosophy, neuroscience, computer science, linguistics, and cognitive anthropology. With pressure on students – especially international students – to complete the PhD fast, these seminars forge common ground.

Summer Schools and International Teaching

Teaching at two invited funded week-long summer schools:

- *'Experience and Knowledge in Early Modern Europe'*, NEH summer program 2001, Folger Institute and Folger Shakespeare Library, Washington D.C. directors Pamela Long (MacArthur Fellow), Pamela Smith (Columbia).
- *'Food, memory and cultural heritage'*, European Institute summer school IEHCA (European Institute for the History and Culture of Food) 2010, François-Rabelais University, Tours, France

Other invited international teaching includes 2000 keynote, graduate seminar course *'Memory in Science'* at the LSE in a series inspired by my work; and at UQAM summer school *'Web Science and the Mind'*, Montreal 2014.

Undergraduate Honours Teaching and Supervision

Honours is an advanced 4th-year undergraduate pathway to the PhD. I taught five distinct units at 4th-year Honours level (1993-1994, 2000-2001, 2004, 2008) and supervised eight Honours thesis projects (six in Philosophy, two in Psychology): six of these students were awarded 1st-class Honours, two awarded Honours 2.1.

Undergraduate Teaching

The bulk of my undergraduate teaching was in the Department of Philosophy at Macquarie before I took on a higher administrative load as Head of Department in 2004 and then moved to a research-intensive position in Cognitive Science in 2008. In that earlier period, I taught history of philosophy, philosophy of mind and cognition, and a range of other areas of philosophy, and in Max Coltheart's undergraduate Cognitive Science unit.

I received a Macquarie University **Outstanding Teacher Award** in 2002. In an external review of Philosophy's undergraduate programs, the external assessor (Paul Redding, Sydney) described my 3rd-year course *Philosophy and Cognitive Science* as 'a very impressive offering', showing 'an exceptional degree of thoughtfulness', commended the unit's creative interaction between philosophical traditions, and concluded that it 'was strikingly impressive in design'.

In Cognitive Science, I developed a new 2nd-year undergraduate unit *Memory*, open to students from all backgrounds, and taught it in 2018 and 2021. I developed a new 3rd-year undergraduate unit *Embodied Cognition and Skilled Performance*, now offered for the second time, specifically for students enrolled in our new degree program.

I have presented guest lectures at Macquarie and other universities in Ancient History, Modern History, Physics, Psychology, Sociology, and Screen Studies. In 1991 at the University of Sydney I taught a full unit *Plato & Aristotle*.

Teaching Grants and Curriculum Innovation

I have been awarded four teaching development grants (1994, 2001, 2012, and 2014) for curriculum design, online materials, and educational research in Philosophy and Cognitive Science, with colleagues including Max Coltheart.

I began my career at Macquarie in the Philosophy Department with a heavy teaching load and a keen interest in interdisciplinary practice. I led or participated in various initiatives for new undergraduate programs across Philosophy, Psychology, and Biology before Cognitive Science became an autonomous centre.

From 2012, I initiated the development of a new undergraduate major in Cognitive Science (previously a research-only ARC-funded research centre), working closely with colleagues in Philosophy and Psychology. This developed into a full undergraduate degree, the Bachelor of Cognitive and Brain Sciences, unique in Australia. I directed our early undergraduate programs, before I hired Dr David Kaplan who now leads a successful degree with high enrolments.

Graduate teaching

In Cognitive Science from 2008, I worked with faculty colleagues to implement graduate seminar requirements for all new PhD students. These seminars provided a shared basis for interdisciplinary research with methods from psychology, philosophy, neuroscience, computer science, linguistics, and cognitive anthropology. With pressure on students – especially international students – to complete the PhD fast, these seminars forge common ground. I have also contributed to MRes teaching.

2014	Presented ' <i>Transactive memory and distributed cognitive ecologies</i> ' at Université du Québec à Montréal (UQAM) Summer School on <i>Web Science and the Mind</i> , Montreal, Canada.
2010	Visiting lecturer – addressing scientific and cultural aspects of the study of memory and the senses – at European Institute summer school ' <i>Food, memory and cultural heritage</i> ', IEHCA (European Institute for the History and Culture of Food), François-Rabelais University, Tours, France
2001	Week as visiting lecturer in NEH summer program at the Folger Institute and Folger Shakespeare Library, Washington D.C. on ' <i>Experience and Knowledge in Early Modern Europe</i> ', directed by Pamela Long (MacArthur Fellow) and Pamela Smith (Columbia). I addressed methodological and historical issues in the comparison of vernacular epistemologies in the 16th century with elite medical and philosophical accounts of perception, memory, and the body in Aristotelian and naturalist traditions.
2000	Keynote speaker for a graduate seminar course ' <i>Memory in Science</i> ' at the LSE, the whole series inspired by my work.

Other Guest Lectures and Invited Teaching

Macquarie University

Invited guest lectures in Ancient History (1994), Modern History (2001, 2002, 2006), Physics (2001-2002), Psychology (1999, 2001), Sociology (2012-2014, 2016-2017).

Other Invited Teaching

Philosophy, University of New South Wales (1998-2000); Screen Studies, Australian Film, Television, and Radio School (2002); Philosophy, University of Sydney (2011).

Representative Course: *Philosophy and Cognitive Science*

Development

I designed this 3rd-year undergraduate course from scratch, drawing on experience teaching cognitive science to Psychology students with Professor Max Coltheart. I worked with colleagues Peter Menzies and Tim Bayne on the structure of our philosophy of mind curriculum. Many students in this course went on to Honours and graduate research in Philosophy or Psychology, and some on into research careers in the interdisciplinary cognitive sciences.

I also developed a distance version of the course for Open Learning Australia, taught since 2004. Working closely with distance education specialists, I recorded customised lectures that continue to draw to Macquarie a small number of outstanding students from outside the university system.

Student responses

Representative comments:

“John is a great lecturer - it's always nice to walk into a class and see your lecturer being enthusiastic about the subject matter. He was also very helpful when aiding students in finding material for our research projects”

“John is able to present complicated ideas succinctly and clearly. One of the best lecturers at this university”

“Fresh approach lacking dogmatic arrogance, did not feel static. Clear explanation. Not feeling bewildered or lost”

“Superb assessment – encouraged hard work (perseverance), rewarded application and originality. Extremely well organized – lecturing was clear and easy to understand. John was always enthusiastic and friendly. The online facilities were also superb”

External assessment - Professor Paul Redding, University of Sydney, 2002

[external review of all teaching in Macquarie Department of Philosophy]

The review described the course as ‘a very impressive offering’, showing ‘an exceptional degree of thoughtfulness’, commended the unit’s creative interaction between philosophical traditions, and concluded that ‘this course was strikingly impressive in design’.

Macquarie’s Deputy Vice-Chancellor John Loxton noted in response that ‘PHIL363 is very impressive in the way it ties structure to outcomes, particularly those concerned with generic skills’.

Teaching grants and curriculum innovation

I began my career at Macquarie in the Philosophy Department with a heavy teaching load and a keen interest in interdisciplinary practice. In 1999 I chaired a cross-disciplinary committee that developed a new template for joint Philosophy and Psychology majors in both BA and BSc degrees, allowing students to take a range of Philosophy courses while completing the Psychology units required for APS (Australian Psychological Society) accreditation.

A parallel committee on which I worked with Mark Westoby (Biology) and Max Coltheart and Sandra Cotton (Psychology) designed a more interdisciplinary degree template '*Mind, Brain, and Behaviour*' in which students select from streams of specified courses in Philosophy, Psychology, and Biology.

After joining the Department of Cognitive Science in 2008, I worked with colleagues to design and implement an outstanding interdisciplinary undergraduate program in Cognitive Science. The department arose from a research centre formed by Max Coltheart in 2000 and we appointed Dr David Kaplan, a philosopher and neuroscientist from the PNP (Philosophy-Neuroscience-Psychology) program at Washington University, St Louis, to work with me on these new initiatives. Dr Kaplan has driven extraordinary success in our teaching.

Milestones include:

- taking the Cognitive Science undergraduate teaching proposals through faculty and university approval processes
- oversight of our first undergraduate courses ('Delusions and Disorders of Mind', and 'Brain and Language') in 2013
- gradually growing the number, scope, and size of our undergraduate courses
- implementing our major new undergraduate program in Cognitive and Brain Sciences in 2016
- substantial growth in income from undergraduate teaching in the department, from zero before 2012
- potential to make new staff appointments on the strength of new teaching income

Teaching Development Grants

Date	Initiative	£
2014	Macquarie University Enhancement Grant, with David Kaplan, for curriculum design and expansion into a new undergraduate major in Cognitive Science.	\$25,000
2012	Macquarie University Faculty Partnership Program grant, for curriculum design, online materials, and video lectures for new undergraduate Cognitive Science unit <i>Disorders & Delusions of Mind</i>	\$25,000
2001	Macquarie University Teaching Development Grant, to develop online resources in my 3rd-year course <i>Philosophy and Cognitive Science</i> . The external teaching reviewer commended the use of online facilities, noting that 'this course has exploited this resource extremely well'.	\$5,000
1994	Macquarie University Teaching Development Grant, <i>Teaching and Learning in the World Lecture Hall: Mosaic for Macquarie</i> , Max Coltheart, Peter Wenderoth, Jonathan Harrington, <u>John Sutton</u>	\$35,000

Undergraduate Honours teaching and supervision

I taught five distinct units at 4th-year advanced undergraduate Honours level, 1993-1994, 2000-2001, 2004, 2008 and supervised the following eight Honours thesis projects. For my MRes teaching see above.

Editorial work – book series

2010 -	<p>Andrew Hoskins (Glasgow) and I have since 2010 edited a book series <i>Palgrave Macmillan Memory Studies</i> (https://www.palgrave.com/gp/series/14682). We planned and designed this interdisciplinary and genuinely international series with our Palgrave editor and recruited an outstanding small editorial advisory board.</p> <p>We have published 89 books in thirteen years, with approaches across the humanities and social sciences. The book series is currently being considered for indexing and inclusion in Scopus/ Web of Science, a surprisingly rare honour for humanities and social science books.</p>

External thesis examiner – graduate research degrees

I have served as external examiner for 15 PhD theses and 7 research Masters theses, for 14 universities. In each case, this involved writing a detailed examiner's report. For three PhDs, an oral defence was also required.

Examiner for Australian universities: University of Adelaide, Flinders University, Murdoch University, University of New England, University of New South Wales, Queensland University of Technology, University of Sydney, University of Western Australia, Charles Darwin University (Northern Territory, Australia), ANU (Australian National University).

Examiner for international universities: University of Edinburgh, University of Hong Kong, Victoria University Wellington, University of Waikato (New Zealand), Massey University (New Zealand).

I have also served as external examiner for seven undergraduate Honours research theses, in Philosophy, Psychology, and History and Philosophy of Science.

Peer review – journal refereeing

Excluding work as editor, I have refereed 203 submitted articles for 94 international journals, across a wide range of disciplines and topics. In addition, as editor or co-editor of six journal special issues, I wrote detailed editorial comments on the 43 papers published in these special issues.

Peer review – refereeing for scholarly publishers

I have refereed 14 full typescripts and 25 book proposals for international scholarly publishers, across many disciplines and topics. These figures exclude editorial work. The publishers include Blackwell, Cambridge University Press, John Benjamins, MIT Press, Oxford University Press, Palgrave, Routledge, Springer, and Taylor & Francis. I have provided endorsements for 18 published scholarly books, from these publishers Cambridge University Press, Karnac Books, MIT Press, Oxford University Press, Palgrave, Polity Press, Psychology Press, Routledge, Springer.

Assessments and Leadership for Funding Bodies

As Detailed Assessor for the Australian Research Council (ARC), I have since 1998 assessed 70 Discovery Project large grant applications, 12 early-career postdoctoral fellowship (DECRA) applications, 11 mid-career Future Fellowship applications, 5 senior Laureate Fellowship applications, and 2 Special Research Initiative (Australian Culture) applications. These assessments have covered projects in philosophy, history and philosophy of science, psychology, cognitive science, and the interdisciplinary cognitive humanities.

In November 2018, I was appointed to the ARC's College of Experts, which assigns assessors to national funding grant schemes, implements and monitors peer review, and recommends fundable proposals, for a 3-year term (<https://www.arc.gov.au/about-arc/arc-profile/arc-committees/arc-college-experts>). Specifically, I served on SACs (Selection Advisory Committees) across Humanities & Creative Arts (HCA) and Social, Behavioural, & Economic Sciences (SBE) panels, for Discovery Projects (2019), DECRAAs (2019, 2021 as Chair of HCA panel), Future Fellowships (2020, Deputy Chair of joint HCA-SBE panel), and NISDRG (National Intelligence, Security, & Defence Research Grants). In this College of Experts work, I directly assessed 180 grant applications across three years.

In March 2022, I was appointed Adjunct Executive Director at the ARC with responsibility across Humanities & Creative Arts and Social, Behavioural, & Economic Sciences. Until my successors were in place in March 2022, I led ARC processes on these panels across all funding schemes, selected assessment committees and nominees to the College of Experts, ran funding panel meetings, researched and implemented policy, and liaised with ARC executives.

I have also assessed funding applications for the National Health and Medical Research Council (NHMRC) project grant scheme, and internationally for the following agencies and funding schemes:

- Belgian FWO (National Fund for Scientific Research), Pegasus Marie Curie Fellowship
- Belgium's University of Louvain Concerted Research Actions funding scheme
- Canada Council for the Arts, Killam Research Fellowship
- Canadian Social Sciences and Humanities Research Council (SSHRC), Insight Grant
- Canadian Social Sciences and Humanities Research Council (SSHRC), Standard Research Grant
- Canada Research Chair (CRC) application
- Croatian Ministry of Science Research Cooperability Program, Crossing Borders Grant
- Danish Agency for Science, Technology and Innovation, DFF Starting Grant
- Danish Agency for Science, Technology and Innovation, Collaborative Research Project Grant
- Netherlands Organisation for Scientific Research, Free Competition Grant
- New Zealand Royal Society, Marsden Fund
- Norwegian Research Council, Scientific Renewal large grant program
- Paris Institute for Advanced Study, *Brain, Culture, & Society* Fellowship program
- UK AHRB (Arts & Humanities Research Board), Research Fund
- UK Leverhulme Trust, Research Project Grant
- Université de Lyon, France, Avenir Lyon Saint-Étienne Programme
- USA: Caltech Francis Bacon Award in the History and Philosophy of Science and Technology
- USA's National Science Foundation (NSF), Broadening Opportunities Program

Consultancies	
Date	Material
2012-present	<p>Initially with Doris McIlwain, I have consulted for and forged an ongoing research partnership with the Australian Cricketers' Association (ACA) on emotional skills, self-regulation, and resilience in professional cricket. Our research was funded in a Partnership Grant jointly by the ACA and Macquarie University, and was conducted in 2013-2014.</p> <p>We presented results at a number of organisational meetings through 2014-2016, including the Cricket Australia High Performance conference in Brisbane, July 2014, and the enterprise bargaining teams from managers and employees in 2015.</p> <p>Our research report was presented to the ACA in 2016, and we are in ongoing consultation with the organisation as they negotiate with employers about ongoing playing, career, and welfare conditions for professional cricketers. I continue to work with CA and the ACA in developing policy and spreading the impact of our research, for example in leading an hour-long workshop in August 2018 at the Induction Day for 50+ newly-contracted male and female professional cricketers, Brisbane.</p> <p>We are currently working with the ACA and Bendelta in development of a new project on preparations for career transitions, and awareness of the transferability of elite sporting skills, for high-level performers in three major national sports.</p> <p>I have presented research workshops on challenges of research partnership projects.</p>
2014	<p>I acted as consultant through the year on <i>The Amnesia Project</i>, an arts/ science collaboration at the National Institute for Experimental Arts (NEIA) at the University of New South Wales, with artist Shona Illingworth, art theorist Jill Bennett, computer scientist Volker Kuchelmeister, and psychologists Amanda Barnier, Martin Conway, and Catherine Loveday. I worked with the team and students through the year on questions about memory, perspective, and self, and in the design of a site-specific artwork. I presented a talk at the <i>Amnesia Atlas/ Signs of Life</i> exhibition opening and forum in September.</p>
2010-2011	<p>I acted as consultant for a group of Sydney digital media and installation artists and performers working together under the banner of SEAM – Somatic Engagement, Agency, and Mediation in digitally mediated environments. I presented a talk on agency and embodiment at the SEAM symposium, Seymour Centre, Sydney, October 2010, and (with Doris McIlwain and Lars Marstaller) undertook a week's intensive fieldwork and consultation with the SEAM collective and Critical Path Dance at the Drill Hall, Rushcutters Bay, Sydney, February 2011.</p>

Academic administrative service and leadership

University administration	
Date	Activity
2017-2019	Promotion committee member, Faculty of Arts for promotion to Associate Professor (Level D) – 8-12 applications annually
2016-2019	University committee assessing, monitoring, and supporting all Macquarie University Research Centres across campus.
2011-2013	University <i>promotion committee</i> member for promotion to full Professor - 10-20 applications annually.
2007-2008	I was one of three academics on the <i>Advisory Committee</i> to a full University Restructure initiated by Vice-Chancellor Stephen Schwartz, a challenging role.
2006-2007	Elected Faculty representative on <i>University Senate</i> .
2005	Chair, University working party on support for research in creative arts and media at Macquarie.
2004-2006	University <i>promotion committee</i> member for promotion to Senior Lecturer as representative of the Deputy Vice-Chancellor (Research), assessing research excellence across all faculties: 30-40 applications annually.
2002-present	I have served on selection committees for 18 academic positions across eight distinct disciplines: Anthropology, Biology, Cognitive Science, Computer Science, Modern History, Philosophy, Physics, Psychology. In chairing my last hiring committee (in Cognitive Science, I led our trial of new practices to deal with implicit bias, working closely with HR advisers. I have presented workshops on these processes.
2002-present	I have served as committee member and assessor on ten distinct internal funding schemes at Macquarie, reviewing over 230 grant applications.
2002-2005	I was one of six members of the University's <i>Research Policy and Management committee</i> (RPMC), engaging in ongoing intensive review and reform of our suite of internal grant schemes, working closely with DVC-R Professor Jim Piper.

Department and faculty administration	
2013-2014	Director of the Department of Cognitive Science, Learning and Teaching committee, overseeing our new undergraduate teaching program (first undergraduate Cognitive Science units in 2013)
2013	(January-July) <i>Acting Head of Department</i> during Anne Castles' sabbatical in Oxford, a significant period for the strategic direction of the Department.
2012-2014, 2016	Coordinator and Director of the Department's new 2-year <i>Masters by Research</i> (MRes) degree program. This Macquarie initiative replaces the traditional Australian Honours degree with a 2-year research Masters, following the Bologna model and preparing students for a 3-year PhD. I led colleagues in the design of eight new taught Masters courses in a coherent syllabus, and I worked with all MRes students in Year 1 and Year 2 from enrolment through examination and beyond.

2011-2017	<i>Deputy Head of Department</i> , Department of Cognitive Science, advising and deputising for HoD. My specific mission was to plan a sustainable future for the Department even in the absence of ongoing national research centre funding. This has now been implemented with a) the development of a substantial and entirely new undergraduate teaching program (with a major and now a full degree program); and b) a new clinic for reading and dyslexia.
2005-2007	Elected <i>Head of Department</i> , Department of Philosophy. This was a period of significant growth, building on the excellent management of the Department by Catriona Mackenzie and Peter Menzies.
2004	(January-October) <i>Acting Head of Department</i> during Peter Menzies' extended sabbatical.
2002-2003	Chair of interim management committee for new interdisciplinary Centre for Research in Social Inclusion.
1992-1994, 1998-2002	I served terms in a range of Departmental administrative roles in Philosophy: director of graduate studies; Honours convenor and convenor of the Graduate Diploma in Philosophy; director of research; seminar organiser; and library convenor.
